NexPark Garage Vision

Operational Excellence and Superior Experience Through Better Garage Management

Leverage the power of AI-driven cameras and technology to enable a dynamic and comprehensive view of your entire parking facility.

What is the NexPark Garage Vision?

Umojo's NexPark Garage Vision is an AI-driven camera system designed to give you detailed visibility across your parking ecosystem any time, from anywhere.

Garage Vision's in-lane transaction monitoring and recording capabilities support facility-wide control and ensure a smooth customer experience, all from a single, centralized remote portal.

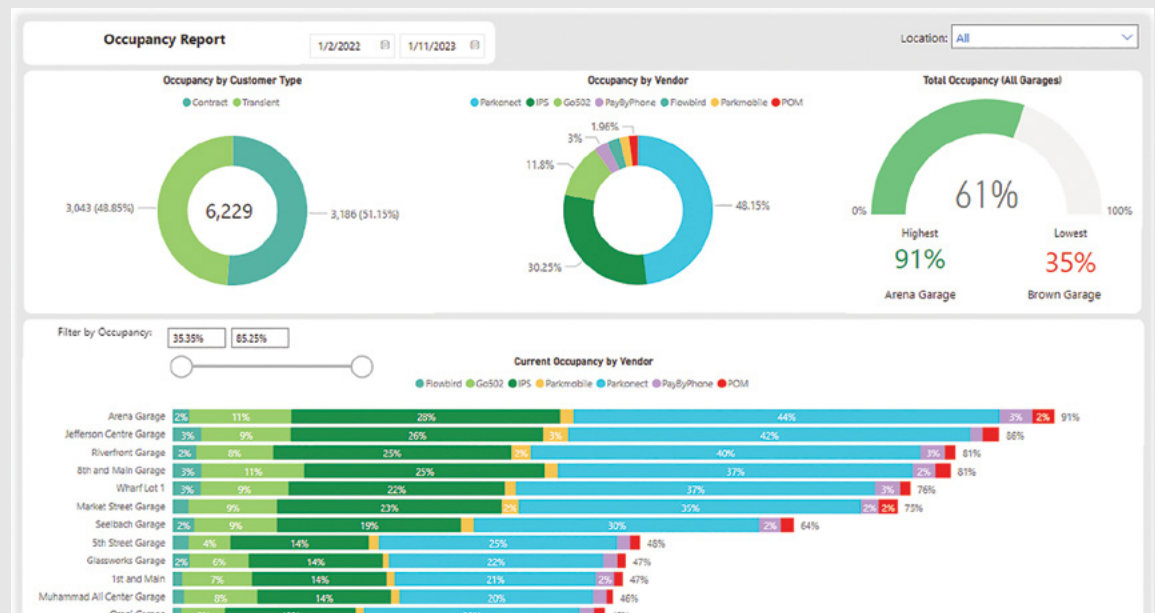

Using Garage Vision's proprietary camera technology throughout your parking facility, you can also obtain real-time occupancy data, create stronger enforcement, and enable a 360-degree view for effective remote facility management.

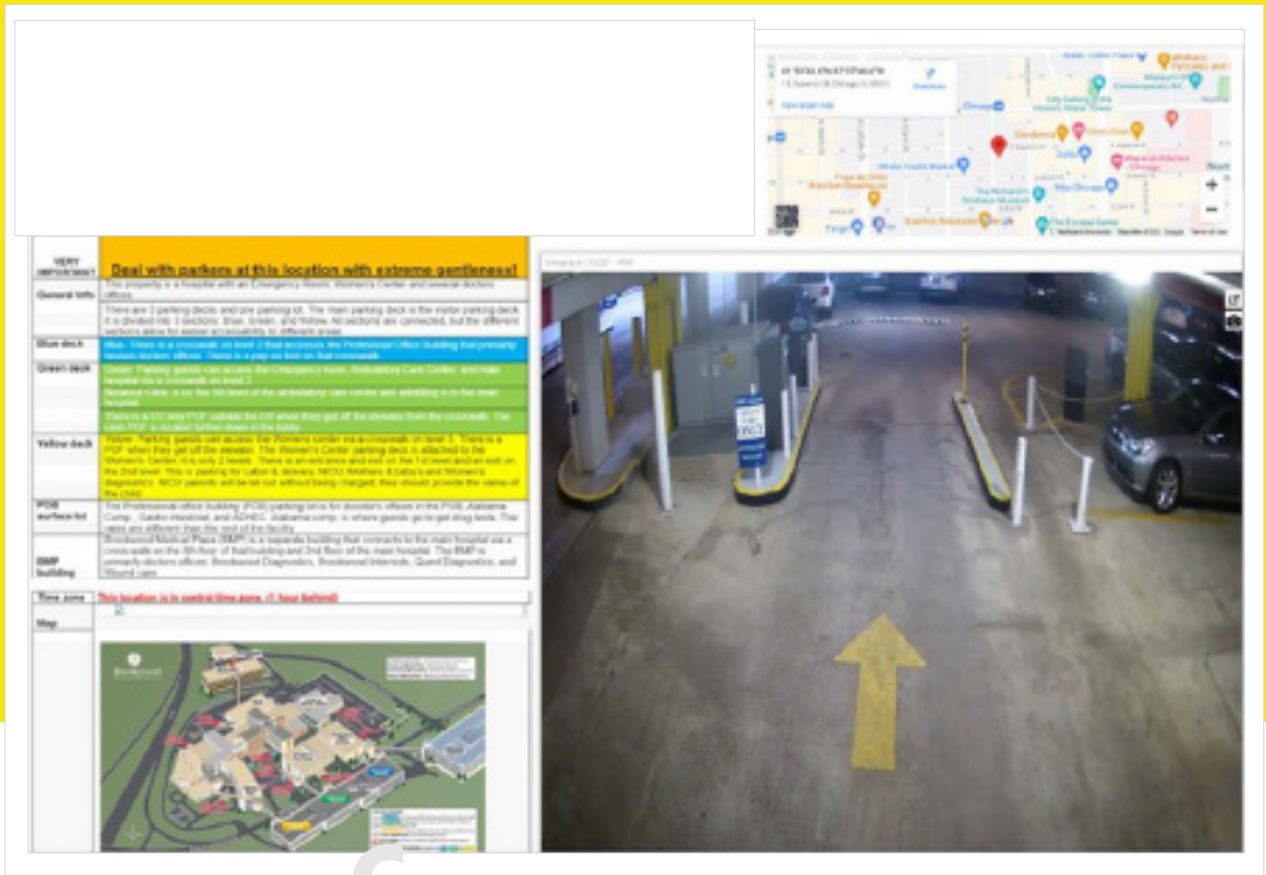

Visibility Beyond License Plate Recognition (LPR)

Typically, parking facilities use license plate recognition (LPR) to track vehicles entering and exiting their facilities by photographing license plates. Sometimes, however, a license plate is covered up, too dirty to read, or simply not there. LPR is ineffective in these situations.

The state-of-the-art technology Garage Vision uses to fingerprint vehicles goes beyond LPR camera capabilities. It enables your cameras to capture highly detailed images of all cars entering and exiting your facility including characteristics like vehicle type and color.

Not only does Garage Vision ensure that every vehicle in your facility can be accurately identified, but it also offers a more effective means to identify and track vehicles such as monthly permit parkers, allowing repeat users quick access into the garage.

Love for NexPark

Why You'll Love NexPark Garage Vision

- **Better Visibility Means Better Control** – Garage Vision provides operators with much more control over their parking facility by providing a dynamic view of everything happening across the garage. Greater real-time visibility allows for better activity tracking and enforcement of parking policies, as well as great security for your parkers.
- **A First-rate Customer Experience** – With in-lane transaction recording, you can analyze every interaction with your parkers to improve customer service and create a more effective operation. Better flow management, frictionless customer touchpoints, improved access for passholders and greater security all made possible by enhanced visibility into your operations contribute to a first-rate experience for your parkers.
- **Lower Operating Costs** – Garage Vision's comprehensive remote monitoring capabilities and automation mean that you don't have to hire staff and security to patrol the garage all the time. Enforcement and investigations into incidents are more effective and take less time and manpower to resolve with video recording of all interactions.
- **Minimize Revenue Leakage** – Enable stronger enforcement of parking rules and drastically reduce revenue leakage across your portfolio through better visibility into every transaction and in-lane monitoring.

Start making better decisions about your parking services offer and operations. [Get a Demo today!](#)

About Umojo

Umojo is a leading platform provider of mobility technology, omnichannel contact center operations, data analytics, and network security to drive operational excellence and superior customer experience for the Mobility Industry. The Umojo Nexus Platform powers the core of all Umojo solutions, and harnesses deep expertise to allow municipalities, parking operators, and businesses to better serve their customers and citizens. Using the most accurate camera AI, and integrations with everyone in the industry, Umojo can provide unmatched insights and controls to on and off-street parking and mobility.
